Work Experience

Software Engineer (Full-time) July 2024 – Present

FindMyVA Australia (Remote)

- Automated hiring and payroll processes, increasing workflow efficiency and reducing manual interaction by 80%.
- Deployed automation solutions on AWS using EC2, Lambda, and Google Apps Script to integrate with Airtable for data extraction.

Full-Stack Web Developer and IT Technical (Intern) March 2024 – June 2024

Trace Alarm and Security System, Inc. Poblacion, Makati City

- Boosted the completion of the company website, reducing the development timeline from the projected 1 year to just 1 month. Optimized website performance, achieving a 30% faster loading time by refining code and website contents.
- Designed and implemented a full stack web application using HTML, CSS, JavaScript, Bootstrap, and PHP to create responsive and user-friendly interfaces. Managed website deployment and hosting using cPanel.

Full-Stack Developer and Data Scientist (Freelance) January 2024 – May 2024

- Proposed and implemented a predictive machine learning model with an accuracy of 87%.
- Implemented Flask-based RESTful APIs to seamlessly integrate machine learning models into web environments, ensuring smooth interaction and data flow. Collaborated closely with clients to understand project requirements, utilizing Python, Flask, and scikit-learn to deliver tailored solutions that address the client's unique needs effectively.

Projects

Educational Video Game Recommendation System [GitHub](#) | [Demo](#)

- Developed an Educational Video Game Recommendation System using Python, Flask, and MySQL, incorporating machine learning algorithms for personalized game suggestions.

Route Optimization using Swarm Intelligence [GitHub](#) | [Demo](#)

- Implemented the optimized approach within a project that leveraged real-time data from the Waze API to enhance travel efficiency.

Inventory Management System with POS [GitHub](#) | [Demo](#)

- Built the system using Visual Studio Code with C# and SQL integrated with Windows Forms. This choice of development environment was driven by its flexibility and compatibility with the specified technologies.

Education

BS Computer Science September 2020 – June 2024

Technological University of the Philippines

- Magna Cum Laude (Top 5% of the University)

Science, Technology, Engineering, and Mathematics Strand June 2018 – March 2020

Dr. Carlos S. Lanting College

Skills

Proficient

Python | C# | SQL | ReactJS | HTML | CSS | Flask | Bootstrap | Tailwind

Intermediate

JavaScript | Express | MongoDB | NodeJS | jQuery | Java | C | C++ | PHP | AWS

Licenses and Certifications

IBM Data Science from IBM (Coursera, 2023)

Full-Stack Web Development with React from The Hong Kong University of Science and Technology (Coursera, 2022)
